Questions for Rocky Flats/Rocky Mountain Greenway opponents

Dear neighbors,

Reminder: some of my postings are an ongoing experiment about how well social media can work in honest, fact-based discourse. Please keep the focus on Rocky Flats.

Don't forget: to convince me (a skeptical person), you'll need to give me a citation to an article. Opinions don't count! (Suggestion: use Google Scholar.)

I'd be happy to learn what Refuge opponents find. (I urge you to get help from Physicians for Social Responsibility, the Rocky Mountain Peace and Justice Center, the Rocky Flats Downwinders, Jon Lipsky or other sources. Use your resources!)

1. Can you describe how plutonium (which emits alpha particles) differs from natural alpha-emitting radioisotopes in Rocky Flats soil?
2. Are health risks from radiation related to the amount of radiation? How?
3. Who are the big players in investigating radiation and health?
4. What fraction of Rocky Flats soil radioactivity (decays per second, say) comes from plutonium?
5. Please compare the dose from inhaling or swallowing plutonium-contaminated dust/dirt with what you get (same routes) from other radioisotopes? (As phrased, you don't need to know the units.)
6. Tell me about "hot particles". What is the evidence that inhaling one causes cancer?
7. What is the evidence there is plutonium deep down in Rocky Flats soil? Where is it?

Chats

Q Search for **Lawn Service**

8. What do the publications about epidemiology among people living downwind of Rocky Flats say about health risks?

Looking forward to hearing from you all, either here or by email: wooddmarv@gmail.com (<mailto:wooddmarv@gmail.com>).

Best wishes--David Wood

I've lived through it all and remember the protests by the rail road tracks, the FBI, EPA and DOE mess, the payouts to homeowners, the sickness and even death.

I've akready seen MANY posts on nextdoor about it and the push back both sides get. So, I'll pass on your research project, whether about Social Media or Rocky Flats (again). But Good luck

(/profile/014drjF5q6sM8YYFP/?is=feed_commenter)

Carol the plan for this greenway is very very extensive. It's not just a bridge, it's extreme digging, moving rocks, flood plane work, irrigation. It's dangerous, and irresponsible. The people pushing this are probably on the beltway project that has been shot down since the 80's. They have an interest in the land because the property around the area.

It is hard to ask for facts and then suggest to people resources that you find worthy. There should be no bias in which scholarly resources one uses. The easiest route is to pick up a nuclear chemistry textbook.

[David \(/profile/01sQjzCnCCFY9LDms/\)](#)

you are not just a citizen. You are also pushing this greenway with heartless and reckless abandon. My family members are literally dead from the exposure of working at rocky flats. It's highly contaminated. Being a high school science teacher does not give you expert level knowledge of why a superfund nuclear trigger site should be

Chats

dug up and opened up to the public. Please obsess over something else.

To Laura C-M and her friends, who carried out their own little conversation unrelated to the topic I launched. You failed to answer the questions and tried to divert the subject. But thanks for illustrating tactics:

Ad-hominem attacks (in the language of fallacies): impugning my motives (I don't work for anyone, nor am I asking people to "do my research for me"); misrepresenting my credentials (I'm not a high school teacher).

Appeal to authority: Find some publications to bolster your opinions, please. Not websites.

Also, I'm sorry to point out, most of the work on the Greenway has been completed, nor does it have any relation to the Jefferson Parkway.

David (/profile/01sQjzCnCCFY9LDms/)

you are not an expert in this field. Why are you pushing this agenda. The work on this green belt is not done. The site is highly contaminated. It's been proven over and over. Your motives are unclear. Those of us who are actual down winders, have family members who have had actual medical issues directly related to the site, living close to the site and exposure know the facts. Again, what is the motivation for you to continue this barrage on Nextdoor for a nuclear superfund site to be open, dug up, blown around and distributed and disturbed? Do you own land? Are you part of the parkway corporation? What is it?

As of this evening, more than 95% of those who WILL read my post have done so. I attempted to make the posting respectful to anti-Refuge people but specific, wanting to understand if the framework for believing Rocky Flats is toxic and dangerous had changed since 2016. I used questions I thought that many people in the Outside World would think are worth asking about Rocky Flats. [When I was teaching undergraduates I would (blush) sometimes just tell seriously struggling students how to proceed (but never the answer). For more talented students I tried to ask questions that would lead to understanding.]

In 4100 views I have received no responses which took a stab. So much for the damn Socratic Method on social media :)

Yes, I've read Full Body Burden and looked at it again just now. Fairly interesting story, lots of anecdotes from which to build a conspiracy theory, but entirely inadequate to understand risk and danger.

I'd like to thank Laura C-M and her friends for doing an excellent job of representing to several thousand people anti-Refuge folks as I remember them and disrupting the thread enough to shut it down. If I had to select one person as typical of anti-Refuge groups, I could not have done better than LCM.

David (/profile/01sQjzCnCCFY9LDms/)
why thank you! I appreciate the shout out! I will happily represent the facts. You again, are not a nuclear scientist. You are not an expert. I believe you have an agenda. The greenway and parkway will till up dangerous soil from a nuclear trigger plant that is an EPA nuclear superfund site. It is not a conspiracy. Conspiracies don't get settlements, bloodwork, tumors, autoimmune disorders, thyroid cancers, cancer, regular government blood testing. Conspiracy theories don't confiscate whole fire trucks, or change science. We have lived this. We have bodies in the ground. I suggest joining a bridge group, or rally for Kamala, or fighting the airport noise. Maybe tutor 2nd grade math?

the anti-refuge folks also refuse to look at other possibilities for illness. There are a lot of factors like nutrition, movement, stress, and other environmental toxins. Are their autopsy reports that specify cause of death from living in/near Rocky Flats? I can understand those who worked at and were exposed every day and were in close proximity to the material, BUT that was before the clean up and removal. My Aunt worked at Rocky Flats for years

Chats

and is a healthy living individual. My family and I are natives and I grew up living near Standley Lake Library. My family (5 of us) are all still living and in good health. So can the critics of RF explain that? I have a family of my own now of 5, and we have been living in Candelas for 10+ years with no issues.
