

The Superfund cleanup

*D. M. Wood, Emeritus Associate Professor
Department of Physics, Colorado School of Mines
October 2023*

This document is a placeholder until the actual document is completed

Contents

<i>Introduction</i>	2
<i>The history</i>	3
<i>Data from before the cleanup</i>	4
<i>Characterization</i>	4
<i>Risks to those living downwind</i>	7
<i>The science of the cleanup</i>	7
<i>Research into required cleanup levels</i>	7
<i>Pushback</i>	8
<i>Risk-based calculations</i>	11
<i>How cleanup levels were decided</i>	12
<i>Choices which depended on specifics of Rocky Flats</i>	12
<i>A post-cleanup perspective</i>	13
<i>Verification</i>	13
<i>Federal and professional appraisal of the cleanup</i>	16
<i>The Refuge</i>	17
<i>Pre-Refuge measurements</i>	17
<i>Recent Refuge soil measurements</i>	18
<i>Conclusions</i>	20
<i>Appendix A: Plutonium depth and time profiles in Rocky Flats soil</i>	21
<i>Appendix B: Common misinformation</i>	22
